ABZAL RAHIMA KOWSAR M

BUSINESS ANALYST | DATA ANALYST | PROJECT LEAD

NJ | (551) 580 0701 | abzal.mod@gmail.com | linkedin.com/in/abzal-m-15609a332

PROFESSIONAL SUMMARY

Versatile Analyst and Project Lead with a Master's in Computer Science and experience across financial services, manufacturing, technology, and geospatial analytics. Experienced in end-to-end ServiceNow and Salesforce initiatives, Agile and PMI methodologies, business process modeling, stakeholder engagement, and data-driven decision making. Skilled in Python, SQL, Tableau, Power BI, ETL, risk analysis, workflow automation, and cloud platforms including AWS and Azure.

PROFESSIONAL EXPERIENCE

Voltas Consulting, NY — **Jan 2024 – Current**
Business Analyst

- Developed Power BI dashboards for compliance, risk monitoring, and sales/finance KPIs; performed risk-impact analysis on billing workflows and ERP compliance.
- Maintained customer pricing and payment records; created UML diagrams and payment-processing user flows using Agile methods, business cases, and root-cause analysis.
- Built Tableau dashboards for regional risk/compliance, payment upgrades, and test-data management; incorporated spatial intelligence for risk assessment and KRI monitoring.
- Led ServiceNow cyber incident management implementation, reducing resolution time by 30%; created UML process maps and business impact analyses for sensitive payment systems.
- Used R, SAS, and SPSS for analysis and modeling supporting compliance and healthcare initiatives, including CCPA/HIPAA-related requirements.

Voltas Consulting, NY — **Aug 2023 – Jan 2024**
Data Analyst Intern

- Managed CRM service requests and SharePoint documentation; automated ETL inventory/storage workflows, improving data refresh speed by 35%.
- Analyzed manufacturing logs with Python to identify anomalies and reduce data security breaches by 15%; supported payment tracking, invoicing, and reconciliation.
- Created process maps and user stories, facilitated workshops, and performed gap analysis and solution design for CRM initiatives, contributing to a 20% improvement in lead conversion.
- Built Python/ETL pipelines to centralize sales and production data and automated SharePoint workflows, reducing resolution time by 40%.

Byte Craft, Hyderabad, India — **Jun 2020 – Dec 2021**
Software Engineer

- Worked on Oracle Fusion ERP Order Management, PeopleSoft integration, and BI Publisher reporting.
- Developed Python/REST API predictive-maintenance solutions that reduced downtime by 25%; supported BlackLine integration and user training.
- Implemented CI/CD microservices with Jenkins, halving release cycles; supported S3 and MacPac integrations.
- Developed Java KPI dashboards and supported transportation-process improvements across JD Edwards, Ellucian, and IFS environments.

HERE Technologies, Hyderabad, India — **May 2019 – Oct 2019**
GIS Analyst Intern

- Corrected and validated spatial data, identified geographic patterns and trends, and combined geospatial and business data into analytical dashboards.
- Collaborated with product and analyst teams to support geospatial data quality and analysis.

EDUCATION

New Jersey Institute of Technology, Newark, NJ
Master's in Computer Science — **Jan 2022 – Dec 2023**

Anurag University, Hyderabad, India
B.Tech Civil Engineering — **Aug 2017 – Jul 2021**

TECHNICAL SKILLS

Programming	Java, Python, SQL
Libraries	NumPy, Pandas, Matplotlib, SciPy
Data & Visualization	SQL, Tableau, Power BI, Advanced Excel, Data Mining, Data Warehousing, ETL
Project & Process Management	Agile/Scrum, Waterfall, Kanban, Risk Management, Jira, Confluence, Scope Definition
Business Analysis	UML, Process Mapping, Change Management, Integrated Risk Management, Workflow Optimization
Database	MySQL, MongoDB, Oracle
Version Tools	Git, Docker, Kubernetes, JUnit, Mockito
Tools & Platforms	Jenkins, SharePoint, Salesforce, MS Visio, Lucidchart, BPMN, ArcGIS, AWS, Azure
Methodologies	Agile, Waterfall, SDLC
Analysis & Communication	Stakeholder Engagement, Requirements Gathering, BRD/FSD Creation, Technical Documentation
Operating Systems	Windows, Linux

PROJECTS

Sentiment Insights Engine | *Python, NLTK*
- Built a sentiment classifier achieving 90% accuracy to analyze social-media feedback trends.
- Developed a responsive React and Material-UI frontend with real-time scoring and progress visualization; improved campaign targeting by 20%.

Smart Accommodation Navigator | *Python, Power BI*
- Conducted market research and competitor analysis and created interactive visualizations of high-demand rental zones.
- Improved user engagement by 25% through UX and filtering enhancements while reducing property search time.

TimeVault App | *Django, Python 3, Web3, Ethereum Blockchain, SQLite3*
- Developed a blockchain-based time-capsule application using Ethereum smart contracts with a Django/Bootstrap interface.
- Improved application engagement by 25% through an interactive web experience.
